

All Points Midwest Infrastructure Phase 1 A hendricks county, indiana

Client: Browning Construction, Inc.
Contact: Ms. Christy Wicks

Year: 2007

Project: AllPoints Wetland Mitigation

Project Type: Turnkey Construction

Williams Creek Management understands mitigation/restoration is essential to recover ecosystems that have been degraded or destroyed. Williams Creek Management assists clients with various wetland recovery projects to preserve and restore wetland benefits by re-establishing natural ecological processes. Williams Creek Management provides professional wetland mitigation/restoration services including site preparation, plant preparation, installation, maintenance, and continuous adaptive management. Williams Creek Management minimizes the temporary impacts which may occur during construction and uses methods to create the least disturbance possible.

A local developer was required to complete wetland mitigation due to federally regulated wetland impacts. The mitigation has provided the opportunity for regional water quality improvement within the impaired waterway. Services provided by Williams Creek Management include wetland mitigation specialty construction services in Avon, Indiana. Natural Resource construction services provided:

- Earthwork: stripping and spreading of topsoil, site balance-cut and fill as required
- Installation of agri-drain structure including concrete pad
- Removal and capping of farm tile
- Finish Grading of 436,500 square feet
- Installation of 13,520 square yards of erosion control blankets
- Installation of 99 - 1.5" caplier native trees
- Installation of 110 - 1 gallon native shrubs
- Installation of 2,366 wetland plugs
