

## Brownsburg Station madison county, indiana

Client: Lauth Property Group  
Contact: Mr. Mike Hartman

Year: 2007  
Project: Brownsburg Station Mitigation  
Project Type: Design / Build

Williams Creek Management understands that mitigation/restoration is essential to recover ecosystems which have been degraded or destroyed. Williams Creek Management assists clients with various wetland recovery projects to preserve and restore wetland benefits by re-establishing natural ecological processes. Williams Creek Management provided natural resource construction services to install an off-site wetland mitigation in Frankton, Indiana. Services included:

- Earthwork and installation of agridrain
- Installation of 114,000 square feet of wet meadow seed mix
- Installation of 20,000 square feet of prairie buffer seed mix
- Installation of 50 - 1.5 caliper native trees
- Installation of 153 - 1 gallon native shrubs
- Installation of 3 mitigation signs
