

Delaware Commons madison county, indiana

Client: Williams Creek Consulting, Inc.
Contact: Mr. Brian Catt

Year: 2008
Project: Delaware Commons Wetland Mitigation
Project Type: Design / Build

Williams Creek Management understands that mitigation/restoration is essential to recover ecosystems that have been degraded or destroyed. Williams Creek Management assists clients with various wetland recovery projects to preserve and restore wetland benefits by re-establishing natural ecological processes. Williams Creek Management provides professional wetland mitigation/restoration services including site preparation, plant preparation, installation, maintenance, and continuous adaptive management. Williams Creek Management minimizes the temporary impacts that may occur during construction and uses methods that create the least disturbance possible.

Williams Creek Management provided natural resource construction services to install a wetland mitigation in Madison County, Indiana. Services included:

- Field Staking
- Earthwork
- Rip rap placement
- Installation of 4,500 square feet of prairie seed mix
- Installation of 4,359 square feet of emergent seed mix
- Installation of 640 square yards of erosion control blankets
- Installation of 140 plugs
- Installation of 6 native trees
- Installation of 35 native shrubs
- Installation 250 linear feet of waterfowl exclusion fence
