

## Smokey Row Road / Geist Christian Church Hamilton county, Indiana

Client: Drees Homes  
Contact: Mr. John Waits

Year: 2007-2008  
Project: Stream Mitigation/Restoration  
Project Type: Design / Build

As part of stream restoration, Williams Creek Management offers specialty stream relocation services. In many cases, stream relocation involves the movement of a streambed to a new location, allowing an authorized project to be constructed in the stream's former location.

Williams Creek Management develops innovative solutions for minimizing stream impacts and reducing mitigation costs. Williams Creek Management provides ecological construction management to ensure that projects are constructed with the highest quality and attention to detail. Extensive experience and specialty installation services are provided by Williams Creek Management to deliver superior, client-focused contracting expertise.

Williams Creek Management provided design/build stream and wetland naturalization services at multiple locations within Central Indiana funded as natural resource mitigation projects for a new faith based facility in Hamilton County, Indiana. Services provided include:

- Earthwork
- Installation of 1,530 linear feet of silt fence
- Tree removal
- Installation of 58 native trees
- Installation of 336 native shrubs
- Installation of 44,000 square feet of forested wetland seed
