

AmeriPlex - Indianapolis marion county, indiana

Client: Holladay Construction Group
Contact: Mr. Tim Helton

Year: 2007-2008
Project: AmeriPlex Indianapolis
Project Type: Turnkey Construction

Williams Creek Management provided specialty construction services for a regional water quality and detention facility along with wetland mitigation at AmeriPlex in Indianapolis, Indiana. The project utilized offline water quality basins and wetland creation to provide improvement to large scale water quality management for an urban stream corridor. The natural system also provides "end of pipe" stormwater quality management for the new development located along the flood range of the waterway.

Specific services provided for the water quality and detention facility include:

- 29,040 square yards of finish grading
- Installation of 14,420 square yards of prairie seed mix
- Installation of 6,580 square yards of high marsh seed mix
- Installation of 7,790 square yards of low marsh seed mix
- Installation of 14,760 high marsh plugs
- Installation of 17,500 low marsh plugs
- Installation of 6,480 square yards of erosion control blankets
- Installation of 24,200 square yards of straw mulch
- Installation of No Mow Signage and Stormwater BMP signage

Services provided for on-site wetland mitigation include:

- Mass Earthwork and installation of agridrain
- Installation of 1,370 square feet of silt fence
- Installation of 206,091 square feet of high profile prairie seed mix
- Installation of 205,245 square feet of wetland understory seed mix
- Installation of 206,091 square feet of straw mulch
- Installation of 70 - 1 gallon native trees
- Installation of 335 - 1 gallon native shrubs
- Installation of 4 Mitigation signs
